Health and Safety Policy

New Red Planet regards the management of health and safety as an integral part of its business and as a management priority. It is our policy that all activities and work will be carried out in a safe manner and we will ensure the health, safety and welfare of our employees, workers and others who may be affected by our activities.

Our target is for zero accidents and zero work-related ill health to be achieved by applying current best practice in health and safety management. Compliance with current health and safety legislation is therefore regarded as the absolute minimum standard acceptable.

Proper management of health and safety issues is seen as an integral part of the efficient management of the company's activities, and critical to developing the professional culture of the company and establishing and maintaining a solid reputation with all our customers.

Employees and workers are expected and encouraged to be proactive on health and safety issues as part of the continued development of the health and safety culture of the organisation.

All employees, workers, contractors and sub-contractors are required to co-operate with the company and their colleagues in implementing the policy and shall ensure that their own work is without risks to themselves and others as far as reasonably practicable. Anyone who believes work presents a serious and imminent danger should move to safety and report the concern promptly. NRP will investigate and will not subject anyone to unlawful detriment for raising a safety concern."

The organisation will provide appropriate training and make available competent health and safety advice and adequate resources including time and money so that legal obligations may be met.
